Outsourcing

OMG

This service comprises a set of Operation, Maintenance and Management activities to be carried out by Multitel in terminal equipment (CPE's), in post-sales or post-installation conditions, after the initial startup.

OMG - Operation Maintenance and Management

The most comprehensive OMG service and can include a set of Operation, Maintenance and Management activities, to be developed by Multitel in terminal equipment (CPE's) in post-sale or post-installation condition, after the initial startup.

Benefits

- Multitel specialists are responsible for the technical aspects associated with Operation, Maintenance and Management;
- Adequate and timely response;
- Service quality;
- Proactive supervision of the installed telecommunications solution (Option)

OML - Light Operation and Maintenance

The Light Operation and Maintenance service, commercially known as OML, refers to the set of maintenance activities provided by Multitel in terminal equipment (CPE's) in post-sale or post-installation condition.

After the initial start-up, the Operation/Management and Supervision of the equipment will be the responsibility of the Customer.

Benefits

- Multitel is responsible for the technical aspects of CPE's Maintenance;
- Adequate and timely response;
- Service quality;
- The Customer has absolute control over the CPE's.

Internet

Multitel's Internet Service is aimed at companies or organizations that need a high performance service that allows access, exchange and sharing of a vast set of information and resources.

We use international connectivity via submarine cable, through different providers in order to guarantee continuity of service and minimize the effect of failure of one of the accesses.

National traffic exchanges between the various Internet providers in Angola are established via IXP (Internet Exchange Point).

We offer several types of Internet connectivity service in order to meet the requirements of different types of customers:

- Net_Prime
- Net_Pro
- Net_Sat

VSAT

Multitel's VSat Network, aimed at the business market, is supported by a state-of-the-art high-performance satellite (HTS), has national coverage and supports two-way data, voice, video and Internet communication.

A VSat solution makes it possible to service remote locations, with difficult access or without coverage of the basic network, presenting itself as an advantageous alternative to the terrestrial network, or a complementary offer to terrestrial technologies for backup solutions with effective guarantee of redundancy.

Platform features:

- SkyEdge II Platform - Gilat
- Intelsat Is37e Satellite (EPIC)
- KU band
- Downlink up to 10Mb
- Uplink up to 4Mb
- Symmetrical or asymmetrical solutions depending on the type of service contracted
- High availability and security
- Centralized supervision and management
- Traffic Acceleration and Prioritization Features
- 1.2m or 1.8m remote antennas
- Quick installation
- Traffic-independent monthly fee (Flat Rate regime)
- SLA in accordance with the type of service contracted

Services:

- DataSat
- Net Sat

Video Conference

Start > [Telecommunications](#) > [Video conference](#)

Video conference

VIDEO CONFERENCE.

The Multitel Videoconferencing service allows the creation of a proximity environment for people from anywhere in the world, increasing corporate collaboration and making communication more efficient.

Your company will be able to hold meetings remotely, in real time and at any time of the day. In a world where anticipating market events is essential, travel time and limited budget often condition physical presence.

The Multitel Videoconferencing solution, in addition to guaranteeing a significant reduction in travel and accommodation costs, allows increasing the frequency of meetings with a positive impact on the company's productivity and the quality of life of its executives.

We offer a videoconferencing service via the Internet with business and standard features, for videoconferencing scenarios from Angola/Luanda to the outside, or within Luanda, in a point-to-point scenario.

Video Conferencing Solution:

Videoconferencing – Videoconferencing service via Internet access.

Multitel rents one or 2 Huawei-branded videoconferencing terminals.

- Allows point-to-point connections
- It can be integrated into a Point-Multipoint system, provided that there is a system externally with an MCU unit that controls and broadcasts video calls
- Skype is not supported
- The system only transmits voice and image, there is no document sharing functionality
- STANDARDS and PROTOCOLS: ITU-T H.323, IETF SIP, ITU-T H.239, and BFCP
- Video Standards and Protocols: H.263, H.263+, H.264 BP, H.264 HP, H.264 SVC, and RTV
- Video Resolution: 1080p

Requirements (client):

- Room with minimum technical conditions for holding the conference, namely with regard to sound and light conditions (outdoor light blocking conditions)
- Compatibility with the remote system with which communication is intended.
- Stabilized and rescued energy
- Protective earth
- Internet access, with a minimum of 2 Mbps of stable, dedicated and symmetrical bandwidth
- RJ-45 / Fast Ethernet (FE) interface
- Fixed Public IP
- Monitor, television screen, or projection system with HDMI ports

Prices:

Contact us by email

Customer with Multitel internet will have 15% discount

Dates and times subject to prior appointment and subject to availability, room and equipment.

CPEs

Start > Telecommunications > CPEs

CPEs

As a complement to Multitel's offer of services, we provide CPE's (Routers, Switches and other equipment) on a sale or rental basis and we are responsible for their installation and configuration.

We can extend the scope of our intervention, as an OMG - Operation, Maintenance and Management service , adapted to the Client's needs. Thus, companies or organizations that do not have a qualified technical team or specific know-how to carry out these activities can focus exclusively on their business.

Secured Access

These are additional or complementary solutions to the offer of Private Network (WAN) services and which aim to reduce the criticality of some vital components of the network, providing better performance and stability. The security of the access components is guaranteed by the implementation of different or complementary paths / technologies / redundant equipment.

High availability solutions, consisting of 2 fully redundant accesses:

Service	particularities	Connectivities
Fiber + Optical Link	Limited to locations where: - FO Network Coverage - Line of Sight with a Multitel POP less than 5Km away	FO - up to 1Gb LO - up to 1Gb
Fiber + Optical Link	Limited to locations where: - FO Network Coverage - Line of Sight with a Multitel POP less than 5Km away	FO - up to 1Gb LO - up to 1Gb
Fiber + Optical Link	Limited to locations where: - FO Network Coverage - Line of Sight with a Multitel POP less than 5Km away	FO - up to 1Gb LO - up to 1Gb
Fiber + Optical Link	Limited to locations where: - FO Network Coverage - Line of Sight with a Multitel POP less than 5Km away	FO - up to 1Gb LO - up to 1Gb
Fiber + Optical Link	Limited to locations where: - FO Network Coverage - Line of Sight with a Multitel POP less than 5Km away	FO - up to 1Gb LO - up to 1Gb

Latency Critical Applications

The use of some applications or services due to their criticality may require the implementation of Quality of Service (QoS) or differentiated Classes of Service (CoS).

If the standard configuration for the service provided to your Network does not meet these requirements, Multitel may find the best solution to overcome this limitation.

Lan-to-Lan

Very high speed interconnection solution, for interconnecting Data Centers or corporate headquarters, with Optical Fiber solutions, Microwave or Optical Links, the solution depending on the specific location of the terminal points and/or their location in relation to a Multitel POP.

When justified, the solution can be supported end-to-end on MPLS Switches.

No backbone pass

The solution to be implemented depends on the characteristics of the locations, the Customer's requirements and requiring line of sight between the endpoints if it is implemented over Micro Wave Links or Optical Links.

Passing through the Backbone

The solution to be implemented depends on the characteristics of the locations, the Customer's requirements and requiring line-of-sight between the endpoints and the POP closest to the Multitel network if it is implemented over Micro Wave Links or Optical Links.

Web Services

Domain Registration

The Domain Registration gives the Organization of companies a professional image, while identifying all users with the entity they represent, either by making it available on a WEB site or by making it available in the form of an electronic address.

Multitel supports the Customer in the administrative procedures for registering the name with the entity, which at the national level are responsible for registering domains.

DNS Management

The DNS Management service is intended for any Organization with Multitel Internet access that, needing to maintain public IP addresses for its Web, Mail or other services servers and does not want to worry about managing the associated DNS.

Web Hosting

Multitel's Web Hosting service in a Microsoft or Linux environment allows the Customer to make information available on the Internet in a convenient and effective way. It is intended for all business customers who do not have a public web server

Web Housing

MULTITEL's Housing service offers the possibility of housing the customer's equipment in specialized facilities, ensuring a permanent and robust connection to the Internet.

Message from Management

For 22 years, MULTITEL has contributed to the development of the Telecommunications sector, delivering services to critical customers that operate with high quality and reliability. All the experience acquired over this time is reflected in the agility of MULTITEL solutions, in the dynamism of our team and in the commitment to increasingly strengthen the proximity with our customers, partners and suppliers that are the basis of our need to adapt us and innovate constantly.

Today more than yesterday we are committed to looking more holistically at the market with a focus on customer needs, and we embrace with great responsibility the trust placed in us.

The results delivered in the last two decades have always been a consequence of the actions of our teams, which will always be reflected in our priority of investing in the valorization and development of our human capital, with a view to responding to the real needs and highest expectations of our customers providing them with unique experiences.

At Multitel, customer focus and continuous improvement at an individual and collective level are without a doubt a huge and fun challenge, and we have been working with this spirit over time.

We have a strong and united young team, dedicated to building trusting relationships with all stakeholders in the telecommunications and information technology sector.

Partnership Agreement between the Luanda Provincial Swimming Association and Multitel

The General Management of Multitel and the Provincial Swimming Association of Luanda, celebrated last Thursday the 25th at 11:30 am at Multitel's headquarters a partnership and cooperation contract that will initially correspond to a period of 12 months, and may be renewed for another period. agreed between the interested parties. The Ceremony was attended by Ms. Suzeth Marinela Barros Dos Santos (President of the Board of APNL) along with Dr. Gilberto Silva (Vice-President for Exchange) On behalf of Multitel, CEO Kussi Bernardo, CTO Leonel Augusto and some members of the company's Board of Directors were present.

The Provincial Swimming Association of Luanda is a non-profit institution whose main objective is to promote the development and massification of teaching and the practice of swimming in the province of Luanda. Henceforth APNL undertakes to use the Multitel logo as well as its advertising in all events organized by the association both nationally and internationally, award MVP athletes for the dissemination and promotion of various services and products, among other obligations present in the contract.

On the other hand, Multitel, a Telecommunications, Technologies and Information Systems company present in the Angolan market for over 20 years, is willing to provide a free 25 MB internet package, using Microwave/Point to Point technology. Internet coverage of competitions and activities organized by APNL. Grant advertising material to be distributed to supporters, members and supporters of the association.

During the meeting, the feeling of satisfaction shown by both entities was remarkable, as for Multitel it has been quite gratifying to embrace projects linked to the sports and social sphere, which have greatly helped in the development and practice of some modalities by young people and teenagers "especially those who live in more deprived areas" who look to sport as one of the ways they can excel in life.

Welcome to the new year 2022!

Welcome to the new year 2022!

The year has just begun, and our employees, partners and customers have already started training with a positive perspective on the results that can be reaped in this new year, which is full of challenges and certainly also full of opportunities.

We have to start with the health and safety of our employees, partners and customers to keep humanity safe at all times and especially in times of a pandemic like the ones we have been experiencing for two years.

Our ability to adapt and human resilience will always be critical to this whole process, and we will certainly, throughout our training, plans, commitments and execution, draw on the experiences learned from things that went well and less well, throughout our 23 years in general, and the last 2 in particular.

Interclube's football field defaults to 90 minutes for each game, and for our organizational field we translate to 90 days of running opportunities to score 1% improvement goals each day.

In this new year, we want you to keep the flame of belief in a better and more efficient company lit, and we wish you to live a safe and healthy year with your family and friends.

I would like to take this opportunity to thank the entire MULTITEL Team, employees, members of the board of directors, executive committee and management board and shareholders, for giving their best to guarantee our ability to do four times more, to improve one percent every day in adverse situations and with limitations that are still known to all of us. I also thank our customers, suppliers and partners for continuing to place their trust in our Company and our management bodies, and for demanding more from us and supporting us in maintaining this relationship of trust.

Kussi Bernardo

CEO
